Water Well Permitting Procedures

Site Plan Requirement for Water Wells

With all the new requirements regarding water wells and the GSA 's, The County is requiring the maps to be very specific and clearly illustrated with the additional information shown on the site plan.

Please include the following:

- 1) Location of the new well, showing setbacks from any point of contamination within 100' and from the property line.
- 2) Location of the old well with dimensions from the new well
- 3) Septic Systems tanks and leach line, showing dimensions from the new well.
- 4) GPS coordinates of the new well.
- 5) Location of any existing wells within 200' of the new well.
- 6) An additional map showing the cross streets of the parcel where the well is located.

Landowner Attestation 2a

Prior to issuance of a well permit the Landowner's Attestation shall be completed, signed, notarized, and recorded. After the documents have been recorded provide a scanned copy to our office.

GSA Comment Forms

Prior to issuance of all AG well permits, please provide the signed and approved GSA copies to our office.

Note: Please contact our office regarding domestic well requirements from your designated GSA.

Online Permit Center <https://cdapermits.countyofkings.com>

For your convenience, the Landowner Attestation 2a and the GSA Blank Comment Form are available to download.
